

Supplies Needed:

2 & ½ pipe cleaners
1 pair googly eyes

Step 1:

Fold 2 long pipe cleaners in half.

Step 2:

Cut the folded pipe-cleaners in half – these will be your spider’s legs!

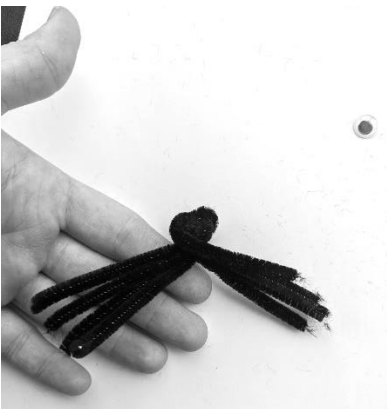

Step 3:

Wrap the 5th pipe-cleaner around the middle to make the spider’s body!

Step 4:

Twist the legs once around the center bit to secure it in place.

Step 5:

Bend the legs into V-shapes beside the body, and then bend each end out to form little feet!

Step 6:

Remove sticky-backing from googly-eyes to attach them to your spider’s “face”

★ To turn this into a spider ring, you can use a 3rd ½ pipe-cleaner twisted into the cluster of legs (at Step 3 or 4). Instead of shaping the extra 2 pieces into legs, you can form them into a ring & wear your creation around!
